Analytic Subject Index to Volume 55

References with (A) are to abstracts of papers presented at meetings of the American Physical Society.
References with (L) are to Letters to the Editor.

Absorption coefficient (see also **Scattering of electrons, neutrons, and ions; X-ray, absorption; Collision diameter**)
Internal conversion of γ-rays, S. M. Dancoff, P. Morrison—122; 423(A); J. Halpern, H. R. Crane—260
Klein-Nishina absorption, J. Halpern, H. R. Crane—236(A); 258
Of Rh and In for neutrons, J. H. Manley, J. Hornbostel, H. H. Goldsmith—1116(A)

Accommodation coefficient
Of gases for 1215.7A, W. M. Preston—1125(A)
Of He *vs.* Ni, B. G. Raines—684(A)

Acoustics
Absorption in CO_2; supersonic, H. L. Saxton—1127(A)
Anomalous damping of ultrasonic waves, O. Halpern—881(L)
Chladni patterns on circular plates, R. C. Colwell, J. K. Stewart, A. W. Friend—595(A)
Dissipative acoustic reflection in gases, R. S. Alleman—87
Eigentones at low frequencies, R. H. Bolt—420(A)
Molecular vibrations in CO_2, W. H. Pielemeier, D. Telfair—1127(A)
Supersonic velocity in CO_2, C. J. Overbeck, E. Wiler—1127(A)
Transmission through plates, F. H. Sanders—1127(A)

Adsorption
Energies of adhesion, G. Boyd, W. D. Harkins—237(A)
Surface states in solids, W. G. Pollard—1147(A)

Aerodynamics (see also **Hydrodynamics**)
Stresses in turbulent air flow, H. K. Skramstad—1141(A)

Afterglow
In N_2, J. Kaplan—583(L); 606(A)
Nitrogen forbidden line, R. Bernard—511(L); J. Kaplan—598(A)

Alloys (see **Crystalline state**)

Astrophysics
Einstein's field equations for spheres of fluid, R. C. Tolman—364
Energy production in red giants, G. Gamow, E. Teller—791(L)
Energy production in stars, H. A. Bethe—103(L); 434
Energy transformations in novae, R. Gunn—591(A)
Excitation of O^{++}, M. H. Hebb—1114(A)
Great nebulae, origin of, G. Gamow, E. Teller—654
Highly collapsed stars, F. Zwicky—726
Interstellar atoms and ions, R. M. Langer—423(A)
Lyman lines in solar emission, H. Hemmendinger—1119(A)
Massive neutron cores, equilibrium of spheres, J. R. Oppenheimer, G. M. Volkoff—374; R. C. Tolman—364; G. M. Volkoff—413(L); 421(A)
Prediction of sunspot cycle, J. Q. Stewart, F. C. Eggleston—1102(L)
Stellar evolution, G. Gamow—718; 796(L)
Temperature in white dwarfs, R. E. Marshak, H. A. Bethe—681(A)

Atomic and molecular beams
Of K and K_2 in gases, P. Rosenberg—1267(L)
Proton diffraction by vapors, H. J. Yearian—242(A)

Atomic form factors
For Zn in ZnO, K. Lark-Horovitz, C. H. Ehrhardt—605(A)

Atomic structure (see also **Energy states of atoms; Spectra**)
Electron velocities in nitrogen and methane, A. L. Hughes, M. A. Starr—343
Self-consistent field for Cr II, R. L. Mooney—557; 598(A)

Biophysics
Biological action of radiation, F. S. Brackett, A. Hollaender—1120(A)
Cell division, G. Young—1102(L)
Effects of densely ionizing radiation, K. G. Zimmer, N. W. Timoféeff-Ressovsky—411(L)
Integrating meters for ultraviolet, J. B. H. Kuper, F. S. Brackett—1128(A)
Introduction of drugs into the skin, H. A. Abramson—676(A)
Nerve conduction, A. M. Weinberg—240(A)
Pain threshold with thermal radiation, J. D. Hardy, H. G. Wolff, H. Goodell—1146(A)
Photolethal action of methylcholanthrene on yeast, A. Hollaender, P. A. Cole—597(A)
Proton beam for biological investigations, G. W. Scott, Jr., C. P. Haskins—1112(A)
Ultraviolet microscopy, chemical structure in cell, P. A. Cole—597(A)

Broadening of spectral lines
General solution for equations, L. Spitzer, Jr.—361
Stark-effect of hydrogen lines, L. Spitzer, Jr.—699

Conductivity, electrical (see **Electrical conductivity; Discharge of electricity in gases**)

Conductivity, thermal (see **Thermal conductivity**)

Constants, physical, standards
Fine structure constant, R. T. Birge—1119(A)
Re-evaluation of atomic constants, F. G. Dunnington—683(A)

Cosmic radiation
Absorption in air and water, instability of barytron, T. H. Johnson, M. A. Pomerantz—104(L); 600(A)
Alfvén's "cosmic cyclotron," E. R. Sabato—1272(L)
Angular distribution of hard rays, P. Weisz—1266(L)
Anomalies in directional intensity, H. S. Ribner—1271(L)
Asymptotic orbits, A. Baños, Jr.—621

Barytron secondaries, J. I. Hopkins, W. M. Nielsen, L. W. Nordheim—233(A)
Bursts in lead, M. Schein, P. S. Gill—1111(A)
Diurnal variations, J. L. Thompson—233(A)
East-west asymmetry, T. H. Johnson, J. G. Barry—503(L)
Effect on radioactive K, W. R. Smythe—316(L)
Energies as function of latitude, R. A. Millikan, H. V. Neher—599(A)
Fine structure in angle distribution, D. M. Cooper—1272(L)
Galactic rotation and intensity, M. S. Vallarta, C. Graef, S. Kusaka—1
γ-ray ion currents, J. W. Broxon, G. T. Merideth—883
G-M counters in stratosphere, L. F. Curtiss, A. V. Astin, L. L. Stockmann, B. W. Brown—600(A)
Hard component, L. W. Nordheim, M. H. Hebb—1111(A)
Heavy particles in cloud chamber, G. Herzog—1266(L)
Latitude effect, B. Gross—112(L)
Latitude effect, large bursts, W. P. Jesse, P. S. Gill—414(L)
Long period variations, P. S. Gill—429
Mass of mesotron, Y. Nishina, M. Takeuchi, T. Ichimiya—585(L)
Measurements in stratosphere, S. A. Korff, W. E. Danforth—675(A)
Mesotron, mass of, Y. Nishina, M. Takeuchi, T. Ichimiya—585(L)
Mesotron as name, R. A. Millikan—105(L)
Mesotrons, lifetime of, L. W. Nordheim—506(L)
Mesotrons, occurrence of slow, C. G. Montgomery, W. E. Ramsey, D. B. Cowie, D. D. Montgomery—1117(A)
Motion in interstellar space, H. Alfvén—425
Multiple charged primary particles, M. S. Vallarta—583(L)
Multiple scattering in Pt, J. A. Vargus, Jr.—422(A)
Nature of primary rays, T. H. Johnson—1111(A)
Orbit in field of a magnetic dipole, R. Albagli Hutner—109(L)
On the Pacific Ocean, P. S. Gill—1111(A); 1151
Particles at great depth, J. Barnóthy, M. Forró—870
Penetrating neutral particles, F. R. Shonka—24; 234(A)
Penetrating rays, V. C. Wilson—6; 234(A)
Penumbra at latitude 20°, energy spectrum, R. Albagli Hutner—15; 614
Production of penetrating particles, M. Schein, V. C. Wilson—233(A)
Rays which produce bursts, C. G. Montgomery, D. D. Montgomery—676(A)
Rossi transition curve, W. M. Nielsen—675(A); W. M. Nielsen, J. E. Morgan and K. Z. Morgan—995
Scattering by stars, M. S. Vallarta, R. P. Feynman—506(L)
Shower and vertical intensity, J. Barnóthy, M. Forró—868
Shower phenomena, penetrating rays, W. F. G. Swann, W. E. Ramsey—599(A)
Sidereal time variations, A. H. Compton, P. S. Gill—233(A); J. L. Thompson—11
Soft component, M. A. Pomerantz, T. H. Johnson—1111(A)
Solar component, S. A. Korff, T. H. Johnson—600(A)
Stability of orbits, O. Godart—875(L)
Stopping power of Hg and N_2, J. H. Bartlett, Jr.—803
From supernovae, F. Zwicky—986(L)
World-wide changes, S. E. Forbush—233(A)

Crystal structure

Crystal structure and x-ray, R. Landshoff—631
Of $LiOH \cdot H_2O$, R. Pepinsky—1115(A)
Orientation of crystals by x-rays, F. E. Haworth—684(A)
Solid solutions, J. A. Wasastjerna—986(L)
Super-structure in Ni-Fe crystals, L. W. McKeehan, E. M. Grabbe—505(L); 1142(A)
Uniqueness of x-ray analysis, A. L. Patterson—682(A)
Of Zn at 100° and 298°K, G. E. M. Jauncey, E. M. McNatt—498

Crystalline state

Actinoelectric effects in tartaric acid crystals, J. J. Brady, W. H. Moore—308
Band in Cu crystals, M. Chodorow—675(A)
Band structure of Cu and Ni, W. W. Beeman, H. Friedman—1115(A)
Beta-brass in single crystals, W. Webb—297
Binding energy of Be crystals, C. Herring, A. G. Hill—673(A)
Crystal energy levels, C. B. Ellis—1114(A)
Crystallinity in rubber, S. D. Gehman, J. E. Field—594(A)
Crystallization and melting of rubber, R. B. Dow—1141(A)
Devitrification temperatures, B. J. Luyet—1132(A)
Electronic states and compressibility of Be, A. G. Hill, C. Herring—1140(A)
Electronic structure of alloys, M. F. Manning—682(A)
Energy of electrons in Wigner-Seitz theory, R. Landshoff—603(A)
Internal friction in metals; grain size, R. H. Randall, F. C. Rose, C. Zener—1140(A)
Momentum of electrons in metal crystal, W. V. Houston—1140(A)
Noncubic growth of single Ag crystals, J. H. Howey—578
Order-disorder process in crystals of Cu-Au, F. C. Nix, D. MacNair—605(A)
Order-disorder transformation in Cu-Zn and Cu-Au alloys, T. C. Wilson—1140(A)
Pressure-temperature phase diagram of Na-K alloys, C. H. Kean—750
Properties of liquid and solid HD, F. G. Brickwedde R. B. Scott—672(A)
Ag films on mica, S. E. Essig—229(L)
Specific heat, vapor pressure of Ta, D. B. Langmuir, L. Malter—1138(A)
Thermal and stress dependence, H. Ludloff—681(A)

Dielectrics and dielectric properties
Of dielectrics dispersed in water, H. Fricke—1141(A)
Diffraction of atoms (see **Atomic and molecular beams**)
Diffusion
Of gases through metals, J. H. Simons, W. R. Ham—1137(A)
Of H_2 through Cu, W. R. Ham—1137(A)
Self-diffusion of copper, B. V. Rollin—231(L); J. Steigman, W. Shockley, F. C. Nix—605(A); W. H. Furry, R. C. Jones, L. Onsager—1083, 1137(A)
Thermal-gravitational separation of isotopes, A. K. Brewer, A. Bramley—590(A); L. Onsager—1136(A)
Discharge of electricity in gases
Anode effect and temperature, P. L. Copeland—1145(A)
Autoelectronic emission in metal arcs, W. S. Huxford, S. G. Eskin, R. W. Jones—1146(A)
Band igniter for Hg-pool tubes, K. J. Germeshausen—228(L)
Breakdown in long tubes, J. R. Dietrich, L. B. Snoddy—591(A)
Cathode blast of Hg rectifier, L. Tonks—674(A)
Charge transfers in lightning, E. J. Workman, R. E. Holzer—598(A)
Convection currents in arcs, C. G. Suits—198
Currents in ring discharge, C. G. Smith—1144(A)
Definition of sparking potential, L. B. Loeb—1121(A)
Discharge between stationary and rotating electrode, J. W. Beams, L. B. Snoddy—504(L); 1145(A)
Discharge on surfaces of solution, L. B. Snoddy, J. W. Beams—663(L)
Electron and potential distributions in Hg arc, L. P. Smith, P. L. Hartman—1145(A)
Electron scattering and plasma oscillations, H. J. Merrill, H. W. Webb—597(A); 1191
Glow to arc transition, F. A. Maxfield, H. R. Hegbar, J. R. Eaton—592(A)
Heat transfer in arcs, C. G. Suits, H. Poritsky—1184
High pressure arcs, C. G. Suits—561
Ionization of Hg, J. Kaplan—111(L)
Lichtenberg figures, F. H. Merrill, A. v. Hippel—1122(A)
Lightning discharge, J. M. Meek—972; 1122(A)
Point-to-plane discharge, S. Gorrill—1121(A); G. G. Hudson—1122(A); A. F. Kip—422(A); 549; 1122(A); H. C. Pollock, F. S. Cooper—593(A); G. W. Trichel—382
Positive column of N_2 arc, E. S. Lamar, A. M. Stone, K. T. Compton—1145(A); 1235
Spark breakdown potentials, F. Ehrenkranz—219
Sparking potentials, R. B. Quinn—240(A)
Sparking potentials at low pressures, R. B. Quinn—482
Spectral lines from Hg arc, O. S. Duffendack, O. G. Koppius—1199
Temperature distribution in Hg arc, W. Elenbaas—294
Townsend coefficients; glow potentials in argon, R. W. Engstrom—239(A)
Townsend coefficients in H_2, D. H. Hale—815; 1121(A)
Townsend coefficients in photo-tubes filled with A, W. S. Huxford—754
Transition from glow to arc, Hsu Yun Fan—769
Wall charge in long discharge tubes, J. R. Dietrich—1145(A)
Disintegration of nucleus (see also **Radioactivity**)
α-particles from $F^{19}+H^1$, W. B. McLean, R. A. Becker, W. A. Fowler, C. C. Lauritsen—796(L)
Angular distribution of disintegration products, R. O. Haxby, J. S. Allen—598(A); R. O. Haxby, J. S. Allen, J. H. Williams—140
Of Be by electrons, G. B. Collins, B. Waldman, W. R. Polye—1123(A)
Of B by ${}_1H^1$, E. L. Hill, R. O. Haxby—147
Of B by slow neutrons, J. B. Fisk—1117(A); M. Goldhaber, R. D. Hill, P. G. Kruger, F. W. Stallmann—1117(A)
Cross sections of metallic U, M. D. Whitaker, C. A. Barton, W. C. Bright, E. J. Murphy—793(L)
Detonation by fission, E. Feenberg—980(L)
Distribution in angle of H^1 from H^2-H^3 reaction, A. Ellett, J. A. Van Allen, D. S. Bayley—1129(A)
Electrodisintegration of Be, theory of, G. B. Collins, B. Waldman, W. R. Polye—412(L); 1123(A); E. Guth—411(L)
Energy production in stars, H. A. Bethe—103(L); 434
Excitation functions of Li and B, R. B. Bowersox—240(A)
Excitation for He, J. M. Cork, B. R. Curtis—1264(L)
Excitation of In with α-particles, K. Lark-Horovitz, J. R. Risser, R. N. Smith—878(L)
Excitation of intermediate elements, E. J. Konopinski—235(A)
Fission of U, P. Abelson—418(L); H. L. Anderson, E. T. Booth, J. R. Dunning, E. Fermi, G. N. Glasoe, F. G. Slack—511(L); in cloud chamber, D. R. Corson, R. L. Thornton—509(L); delayed neutron emission, E. T. Booth, J. R. Dunning, F. G. Slack—876(L); 1124(A); droplet fission, R. B. Roberts, R. C. Meyer, L. R. Hafstad—416(L); energy of fragments, E. T. Booth, J. R. Dunning, F. G. Slack—981(L); 1273(L); heavily ionizing particles, G. K. Green, L. W. Alvarez—417(L); mechanism of fission, N. Bohr, J. A. Wheeler—1124(A); J. Frenkel—987(L); neutrons produced, H. L. Anderson, E. Fermi, H. B. Hanstein—797(L); L. Szilard, W. H. Zinn—799(L); by neutrons, γ-rays, J. C. Mouzon, R. D. Park, J. A. Richards, Jr.—668(L); products of cleavage, P. Abelson—670(L); 876(L); G. N. Glasoe, J. Steigman—982(L); radioactive recoils, E. McMillan—510(L); radioactivity of products, G. N. Glasoe, J. Steigman—1124(A); range of fragments, E. T. Booth, J. R. Dunning, G. N. Glasoe—982(L); E. T. Booth, J. R. Dunning, F. G. Slack—981(L); search for β-particles, J. W. Kennedy, G. T. Seaborg—877(L); H. H. Barschall, W. T. Harris, M. H. Kanner, L. A. Turner—989(L)
Fission of U and Th, R. B. Roberts, R. C. Meyer, P. Wang—510(L); delayed neutron emission, R. B. Roberts, L. R. Hafstad, R. C. Meyer, P. Wang—664(L); intensity ionizing particles, R. D. Fowler, R. W. Dodson—417(L); radioactive halogens, R. W. Dodson, R. D. Fowler—880(L); resonance, N. Bohr—418(L)

γ-rays from Al, G. J. Plain, R. G. Herb, R. E. Warren—1135(A)
γ-rays from B+D, E. R. Gaerttner, W. A. Fowler, C. C. Lauritsen—27; J. Halpern, H. R. Crane—415(L)
Identification of x-rays, radioactive elements, P. Abelson—424(A)
Internal conversion coefficients, S. M. Dancoff, P. Morrison—122; 423(A)
Mesotron disintegration, C. C. Montgomery, W. E. Ramsey, D. B. Cowie, D. D. Montgomery—1117(A)
Neutrons from He^5, H. Staub, W. E. Stephens—845
Neutrons from H^2-H^3, low energy, E. Hudspeth, H. Dunlap—587(L)
Penetration of fast protons into nuclei, V. F. Weisskopf, D. H. Ewing—241(A)
Short range particles from Li and α-particles from B, R. B. Bowersox—323
By 6.5 Mev protons, L. A. DuBridge—603(A)
Of U, simple capture of neutrons, H. L. Anderson, E. Fermi—1106(L)
Of U, transuranic elements, E. Segrè—1104(L)

Doppler effect
In canal-ray tube, C. W. Sherwin, A. J. Dempster—582(L)

Dynamics
Inertial mass, P. Fireman—683(A)

Elasticity
Compressibility of Li, C. Herring—598(A)
Constants of NH_4Cl, A. W. Lawson, R. Scheib—1268(L)
Elastic, electric and piezoelectric constants of Rochelle salt, W. P. Mason—775; 1141(A)
Electronic states and compressibility of Be, A. G. Hill, C. Herring—1140(A)
Process of fatiguing, x-ray study, R. G. Spencer—242(A); 991
Stress-strain relationship for rubber, F. E. Dart, E. Guth—1141(A)
Theory of rubber elasticity, E. Guth—593(A)
Thermal dependence in solids, L. Brillouin—1139(A)
Thermal and stress dependence, H. Ludloff—681(A)
Ultrasonic determination of elastic properties, H. Ludloff—593(A)

Electrical conductivity and resistance
Anisotropy of metals, E. M. Baroody—1140(A)
Anomalies of zincblende crystals, M. Distad—1147(A)
β-brass in single crystals, W. Webb—297
Breakdown in single crystals, R. C. Buehl, A. v. Hippel—1122(A)
Change in magnetic field, L. Davis, W. V. Houston—1143(A)
Effect of electron bombardment on zincblende, M. Distad—1146(A)
Effect of pressure on single crystals, R. M. Holmes, H. W. Allen—593(A)
Of liquid Na-K alloys, C. H. Kean—750
Magnetoresistance of Ni, C. W. Heaps—1069
Momentum in electrical conductivity, W. V. Houston—420(A); 1255
Progressive breakdown in a liquid, L. B. Snoddy, J. W. Beams—879(L)
Of tantalum, L. Malter, D. B. Langmuir—743
Thermal dilatation of superconductors, E. C. Westerfield—319(L)

Electrolytes
Ionic volumes in aqueous solutions, G. W. Stewart—240(A)

Electromagnetic theory
Electric currents in terminated lines, R. H. Kent—762
Velocity of radio waves, G. H. Brown—1100(L); A. L. Vitter, L. C. Brieger—416(L)

Electron diffraction (see also **Electrons, scattering of**)
Compounding sine functions, L. R. Maxwell—1135(A)

Electrons (see also **Positrons** and e/m)
Atomic electrons, radiation and pair production, J. A. Wheeler, W. E. Lamb, Jr.—858
Creation of pairs by fast electrons, H. R. Crane, J. Halpern—838
Electron velocities in nitrogen and methane, A. L. Hughes, M. A. Starr—343
Field and self-energy, V. F. Weisskopf—678(A); 1131(A)
Field theory, N. Rosen—94
Interactions of heavy electrons, J. F. Carlson—599(A)
Interchange energy of two free electrons, C. A. Ludeke—315(L)
Retarded interaction, I. S. Lowen—601(A)
Self-energy of electron, H. A. Bethe—681(A)

Electrons, scattering of
Of fast electrons in gases, J. H. Bartlett, R. E. Watson—235(A); A. L. Hughes—350
From ZnO, R. M. Whitmer, H. J. Yearian—1114(A)

Electrons, secondary
Contaminated surfaces, H. Nelson—985(L)
Electron multiplier, J. S. Allen—966; 1133(A)
By H_2^+ and D_2^+ ions on Ni, M. Healea—984(L)
From metals bombarded with protons, J. S. Allen—236(A); 336
Under positive ion bombardment, A. G. Hill, W. W. Buechner, J. S. Clark, J. B. Fisk—463
From Na films, P. L. Copeland—1270(L)
From tungsten and thorium-coated tungsten, E. A. Coomes—519

Electrons, thermionic (see **Thermionic emission**)

Electro-optical effects (see also **Photoelectric effect and properties**)
In colloids, H. Mueller—508(L); 792(L)
Influence of frequency, F. J. Norton—668(L)

E/m
Spectroscopic and free electron values, J. A. Bearden—584(L)

Equations of state
For ammonia and steam, J. L. Finck—682(A)
Of frozen rare gases, G. Kane—1138(A)
Virial coefficient of He, L. Gropper—1095

Errata
Range distribution of the uranium fission fragments, E. T. Booth, J. R. Dunning, F. G. Slack—1273(L)
The scattering of α-particles by argon, oxygen, and neon—G. Brubaker—877(L)

Evaporation
Of tantalum, D. B. Langmuir, L. Malter—748

Field currents
Energy distribution, J. E. Henderson, R. K. Dahlstrom—473
At high and low pressures, B. E. K. Alter, R. T. K. Murray—672(A)

Films, properties of
Activity and orientation of metal films, O. Beeck, A. Wheeler, A. E. Smith—601(A)
Atoms and molecules in extremely thin films, L. H. Germer—605(A)
Potentials of multilayers, W. D. Harkins, R. W. Mattoon—320(L)
Preparation of oriented metal films, A. E. Smith, O. Beeck—602(A)
Reflection from glass, multilayer films, C. H. Cartwright, A. F. Turner—595(A); 675(A)
Reflection of light from glass, K. B. Blodgett—391
Reflectivities of evaporated metal films, G. B. Sabine—1064
Rubbed films of barium stearate, electron diffraction patterns, L. H. Germer, K. H. Storks—648

Fluorescence
And absorption of diacetyl, G. M. Almy, H. Q. Fuller, G. D. Kinzer—238(A)
Of Pb vapor, J. G. Winans, F. J. Davis, V. A. Leitzke—1126(A)
In Hg-Tl mixtures, J. G. Winans, F. J. Davis, V. A. Leitzke—242(A)
Of OH molecules, E. R. Lyman—1126(A)
Sensitized fluorescence of K, E. H. Krause—164
By ultraviolet radiations, N. C. Beese—1126(A)

Geophysics
Intercalibration and comparison of measurements, ages of rocks, R. D. Evans, C. Goodman, N. B. Keevil, A. C. Lane, W. D. Urry—931
Natural fission of Th and U, W. F. Libby—1269(L)
Origin of earth's magnetic field, W. M. Elsasser—489
K^{40}/Ca^{40} and age of earth, A. K. Brewer—669(L)
Radiogenic leads, geological time, A. V. Grosse—584(L); A. O. Nier—153

Hall effect
Calculation of, L. Davis, W. V. Houston—1143(A)

Heat of dissociation
Of CO, H. D. Hagstrum, J. T. Tate—1136(A)

High voltage tubes and machines
Compact high voltage generator, J. G. Trump, R. J. Van de Graaff—676(A); 1160
Cyclotron at Chicago, W. D. Harkins, H. W. Newson, R. J. Moon, A. H. Snell, L. A. Slotin, L. P. Borst, S. L. Simon, B. Carpenter, P. R. Bell—1110(A)
Cyclotron at M. I. T., M. S. Livingston, J. H. Buck, R. D. Evans—1110(A)
Cyclotron at Purdue, W. J. Henderson, L. D. P. King, J. R. Risser—1110(A)
Ion paths in cyclotron, L. H. Thomas—1110(A)
Westinghouse electrostatic generator, W. H. Wells—599(A)

Hyperfine structure (see also **Nuclear moments and spin**)
Of Be I line λ4573A, S. Mrozowski—798(L)
Of Au, R. M. Elliott, J. Wulff—170
Of In III, J. S. Campbell, J. R. Davis—1125(A)
Of λ4686 of He, Djen-Yuen Chu—175; 423(A)
Of Mn I, R. A. Fisher, E. R. Peck—270

Instruments (see **Methods and instruments**)

Ionization by collision (see also **Ionization potentials**)
Of $CHBrF_2$, R. F. Baker, J. T. Tate—236(A)
Excitation in Hg vapor, T. McFadden—797(L); W. B. Nottingham—203
By neutrons in gases, P. C. Aebersold, G. A. Anslow—680(A); 1134(A)
K ionization of Ni by cathode rays, D. L. Webster, L. T. Pockman, K. Harworth, P. Kirkpatrick—682(A)
Probability; Hg atoms by electrons, M. E. Bell—201

Ionization potentials
Of Ca VII and Sc VIII, L. W. Phillips—708
Of Hg, T. McFadden—797(L); W. B. Nottingham—203

Ionization by radiation (see **Photoionization**)

Ionosphere
Changes, radiation from N_2, J. Kaplan—110(L)
Critical frequencies, recording of, O. Rydbeck—1127(A)
E region, E. O. Hulburt—639; during eclipse—646
Motion of clouds of abnormal ionization, J. A. Pierce, H. R. Mimno—1128(A)
Nature of radio fade-out, L. V. Berkner—536; D. F. Martyn—983(L)
Nocturnal *E*-layer, N. E. Bradbury—423(A)

Isomers, nuclear (see **Radioactivity**)

Isotopes
Of Br, separation by centrifuge, R. F. Humphreys—674(A)
Concentration of Cl isotopes, C. Skarstrom, H. E. Carr, J. W. Beams—591(A)
Concentration of U (23 min.), J. W. Irvine, Jr.—1105(L)
Of Hf, Yt, Lu and Ta, A. J. Dempster—794(L)
Of Fe and Cr, A. O. Nier—1143(A)
Mass difference $_4Be^9 - _4Be^8$, S. K. Allison, E. R. Graves, L. S. Skaggs, N. M. Smith, Jr.—107(L); 599(A)
Masses of light elements, S. K. Allison—624
Packing fraction differences, A. C. Graves—238(A); 863
Separation by thermal diffusion, W. H. Furry, R. C. Jones, L. Onsager—1083; 1137(A)
Thermal-gravitational separation, A. K. Brewer, A. Bramley—590(A); L. Onsager—1136(A)
Of U, half-lives of U isotopes, A. O. Nier—150

Joule-Thomson effect
In CO_2, J. R. Roebuck, T. A. Murrell—240(A)

Kinetic theory of gases
Condensation of Hg vapor, J. Slepian, W. M. Brubaker—1147(A)

Liquids (see also **Hydrodynamics**)
Liquid He below λ-point, F. London—235(A)
Properties of liquid and solid HD, F. G. Brickwedde, R. B. Scott—672(A)

Structure of liquid K, N. S. Gingrich, C. N. Wall—1116(A)
Structure of liquid Sn and Cl, C. Gamertsfelder—1116(A)
Unsupported flowing liquid films, B. O'Brien—674(A)

Magnetic properties
Anisotropy of Fe-Ni and Cu-Ni alloys, H. J. Williams, R. M. Bozorth—673(A)
Anisotropy in Ni-Fe alloys, superstructure, E. M. Grabbe, L. W. McKeehan—1142(A); 505(L)
Ferromagnetic impurities in metals, F. W. Constant, J. M. Formwalt—1143(A)
Ferromagnetism of semi-conductors, Syôhei Miyahara—105(L)
Ferromagnetism, theory of, P. R. Weiss, J. H. Van Vleck—673(A)
Higher hydrates of γ- and α-ferric oxide, L. A. Welo, O. Baudisch—1143(A)
Of Fe and Ni at ultra-high radiofrequencies, J. L. Glathart—833
Magnetoresistance of Ni, C. W. Heaps—1069
Of Ni crystals; temperature effects, T. Okamura, T. Hirone—102(L)
Origin of earth's magnetic field, W. M. Elsasser—489
Paramagnetic relaxation, theory of, J. H. Van Vleck—673(A)
Permeability of Fe and Ni from 98 to 410 megacycles, J. B. Hoag, N. Gottleib—410(L)
Powder patterns on crystals, J. W. Shih, Tsu-Yen Chai—1265(L)
Reversible magnetization, theory of, W. F. Brown, Jr.—568
Saturation of Fe and Ni, A. R. Kaufmann—1142(A)
Shape of domains in ferromagnetics, E. H. Kennard—312
Susceptibilities in weak fields, L. G. Hector, M. F. Peck—672(A)
Susceptibility of Cu-Fe alloys in high fields, F. Bitter, A. R. Kaufmann—1142(A)

Magneto-optical effects
Of nickel sulfate, α-hexahydrate, L. R. Ingersoll, P. Rudnick, F. G. Slack—672(A)

Mass defects (see **Isotopes**)

Mechanics, quantum—general
Born's reciprocity and Mie's theory, A. Landé—1132(A)
Contact-transformations, J. M. Jauch—1132(A)
Iteration method, G. Horvay—70; 604(A)
Symmetry properties of variational functions, H. M. James, A. S. Coolidge—873

Mechanics, statistical
Proof of *H* theorem, O. Halpern, F. W. Doermann—1077

Melting point
Of tantalum, L. Malter, D. B. Langmuir—743

Mesotrons
Lifetime, L. W. Nordheim—506(L)
Mass of, Y. Nishina, M. Takeuchi, T. Ichimiya—585(L)
Name, R. A. Millikan—105(L)
Occurrence of slow, C. G. Montgomery, W. E. Ramsey, D. B. Cowie, D. D. Montgomery—1117(A)

Metals (see **Crystalline state**)

Meteorology
Distribution of ozone in stratosphere, W. W. Coblentz, R. Stair—590(A)
Solar constant determinations, B. O'Brien—1142(A)

Methods and instruments
Ages of rocks, R. D. Evans, C. Goodman, N. B. Keevil, A. C. Lane, W. D. Urry—931
Air-blast atomization, R. A. Castleman, Jr.—592(A)
Band igniter for Hg-pool tubes, K. J. Germeshausen—228(L)
β-ray spectrometer, C. Witcher, E. Haggstrom, J. S. O'Conor, J. R. Dunning—1135(A)
Calibration of ionization chamber, W. Gentner, E. Segrè—814; G. T. Seaborg, E. Segrè—808
Camera for study of nuclear scattering, T. R. Wilkins, G. Kuerti—1134(A)
Circuit of short resolving time, L. A. Turner—1134(A)
Compact high voltage generator, J. G. Trump, R. J. Van de Graaff—676(A); 1160
Compounding sine functions, L. R. Maxwell—1135(A)
Continuously sensitive cloud chamber, A. Langsdorf, Jr.—421(A)
Control of current-intensity in spot-welding, W. B. Nottingham—1144(A)
Counters, design and construction, G. L. Locher—675(A)
Counters of unconventional geometry, S. C. Brown, R. D. Evans—1133(A)
Counting rate meter, R. D. Evans, R. L. Alder—1134(A)
Current control device, J. L. Lawson, A. W. Tyler—238(A)
Cyclotron at Chicago, W. D. Harkins, H. W. Newson, R. J. Moon, A. H. Snell, L. A. Slotin, L. P. Borst, S. L. Simon, B. Carpenter, P. R. Bell—1110(A)
Cyclotron at M. I. T., M. S. Livingston, J. H. Buck, R. D. Evans—1110(A)
Cyclotron at Purdue, W. J. Henderson, L. D. P. King, J. R. Risser—1110(A)
Detection of single ions, electrons and photons, J. S. Allen—966; 1133(A)
Dilatometer, elevated temperatures, F. C. Nix—606(A)
Dispenser cathode, thermionic cathode for gaseous discharge tubes, A. W. Hull—1145(A)
Electrolytic "polishing" of W, J. M. Hughes, E. A. Coomes—1138(A)
Electron spectrograph, W. T. Harris—1135(A)
Energies of soft β-radiations, W. F. Libby, D. D. Lee—245
Field distribution in Hailer canal-ray tube, C. W. Sherwin, A. J. Dempster—582(L)
Flowing liquid films, B. O'Brien—674(A)
Focused source of ions, G. W. Scott, Jr.—954
Fundamental space-time coordinates, E. E. Witmer—1132(A)
γ-radiation in roentgens, T. N. White, L. Marinelli, G. Failla—676(A)
γ-ray detector, L. Marinelli—677(A)
γ-ray energies, measurement of, D. C. Kalbfell—422(A)
Gettering powers of metals for gases, L. F. Ehrke, C. M. Slack—684(A)

Methods and instruments (continued)
High current ion tube, H. R. Crane, N. L. Oleson—1110(A)
High intensity bombardment, F. N. D. Kurie—241(A)
Integrating meters for ultraviolet, J. B. H. Kuper, F. S. Brackett—1128(A)
Intense ionic beams, L. P. Smith, G. W. Scott, Jr.—946
Ionization in chambers by fast neutrons, P. C. Aebersold, G. A. Anslow—1134(A)
Ions in cyclotron, L. I. Schiff—422(A)
LiF achromats for large spectral ranges, C. H. Cartwright—606(A)
Magnetic electron lenses, L. Marton—672(A)
Model for electron motion in a magnetic field, A. Rose—1144(A)
Modulation of G-M counters, J. N. Shive—1133(A)
Molecular beam resonance method for measuring nuclear magnetic moments, P. Kusch, S. Millman—596(A); S. Millman—628; I. I. Rabi, S. Millman, P. Kusch, J. R. Zacharias—526
Negative power factors in air capacitors, A. V. Astin—594(A); explanation, H. L. Curtis, A. V. Astin—594(A)
Neutron measurements with counters, S. A. Korff, W. E. Danforth—980(L)
Orientation of crystals by x-rays, F. E. Haworth—684(A)
Oriented metal films, A. E. Smith, O. Beeck—602(A)
Oscillator for ultra-high frequency, R. King—1127(A)
Particle size determination; x-ray reflection, C. Nusbaum—1115(A)
Photronic cells and photometric measurement, H. S. Stewart, Jr., B. O'Brien—1121(A)
Proton beam for biological investigations, G. W. Scott, Jr., C. P. Haskins—1112(A)
Quenching rates in alloys, H. L. Logan—1139(A)
Quiet boiling, N. E. Dorsey—594(A)
Radiation pyrometer, J. Strong—1114(A)
Recording G-M counter, L. J. Brady—1133(A)
Recording voltmeter for lightning studies, E. J. Workman, R. E. Holzer—606(A)
Reduction for rotation group, J. M. Keller—508(L)
Reflection from glass, reduction, C. H. Cartwright, A. F. Turner—595(A); 675(A)
Reflection of light from glass; interference, K. B. Blodgett—391
Resolving power of apparatus, R. C. Spencer—239(A)
Roots of polynomials, mechanical synthesizer, S. L. Brown—604(A)
Scaling circuits in random counts, H. Lifschutz, O. S. Duffendack—412(L); 1133(A)
Separation of gas isotopes, A. K. Brewer, A. Bramley—590(A); L. Onsager—1136(A); theory, W. H. Furry, R. C. Jones, L. Onsager—1083, 1137(A)
Separation of gases by centrifuging, J. W. Beams—591(A)
Separation of nuclear isomers, E. Segrè, R. S. Halford, G. T. Seaborg—321(L)
Single crystals of Fe, Co, Ni and their alloys, P. P. Cioffi, O. L. Boothby—673(A)
Source of band spectra excitation, O. H. Wulf, E. H. Melvin—600(A); 687
Spectrophotometer, infra-red, J. D. Hardy, A. I. Ryer—1112(A)
Spherical coil for uniform field, J. A. Hipple, Jr.—597(A)
Stopping power of hydrogen for H^1, F. T. Rogers, Jr.—588(L)
Superconductivity for radiometric purposes, A. Goetz—1270(L)
Temperature gradient in arc welding of cylindrical tubing, W. A. Bruce—594(A)
Theoretical physics and pure mathematics, J. T. O'Callahan, S.J.—683(A)
Theory of scaling circuits, H. Lifschutz, O. S. Duffendack—1133(A)
Thermal conductivity of solid or molten metals, C. C. Bidwell—1139(A)
Ultracentrifuge for liquids, A. V. Masket, F. W. Linke, J. W. Beams—674(A)
Ultrasonic determination of elastic properties, H. Ludloff—593(A)
Velocity of light apparatus, W. C. Anderson—1128(A)
Westinghouse electrostatic generator, W. H. Wells—599(A)
X-ray spectrometer, high vacuum, J. H. Munier—1116(A)

Molecular structure and constants (see also **Spectra, molecular** and **Raman spectra**)
Of CO, S. E. Whitcomb, R. T. Lagemann—181
Distances in gas molecules Se_2, HgCl, Cu_2, Cl_2, $CuBr_2$ and Cu_2I_2, L. R. Maxwell, V. M. Mosley—238(A)
Effect of shape on attraction in monolayers, R. T. Florence, W. D. Harkins—237(A)
Exchange forces in H_2, H. Beutler—1118(A)
Molecular vibrations in CO_2, W. H. Pielemeier, D. Telfair—1127(A)
Tetrahedrally symmetrical molecules, W. H. Shaffer, H. H. Nielsen, L. H. Thomas—1130(A)

Neutrino (see also **Radioactivity**)
Absorption, H. R. Crane—501
Recoil nucleus in β-disintegration, J. Halpern, H. R. Crane—1123(A)
Theory of, W. H. Furry—602(A)

Neutrons
Absorption by B, Co and Mn, E. O. Salant, W. J. Horvath, H. I. Zagor—111(L)
From breakup of He^4, H. Staub, W. E. Stephens—845
Capture by atoms in a crystal, W. E. Lamb, Jr.—190; 234(A)
Collimation of fast neutrons, P. C. Aebersold—596(A)
Cross sections, M. D. Whitaker, H. G. Beyer—1124(A)
Depolarization in ferromagnetic media, O. Halpern, Th. Holstein—601(A)
Dipole-dipole resonance forces, G. W. King, J. H. Van Vleck—1165
Forward scattering by paramagnetic media, J. H. Van Vleck—924
Highly collapsed stars or neutron stars, equilibrium of spheres, J. R. Oppenheimer, G. M. Volkoff—374; R. C. Tolman—364; G. M. Volkoff—413(L); 421(A); F. Zwicky—726

Magnetic scattering, O. Halpern, M. H. Johnson—898
Measurements with counters, S. A. Korff, W. E. Danforth—980(L)
Neutron-proton interaction, J. Schwinger—235(A)
Resonance absorption in In, J. H. Manley, H. H. Goldsmith, J. Schwinger—107(L)
Scattering cross section, V. W. Cohen, H. H. Goldsmith, J. Schwinger—106(L)
Scattering of D-D neutrons, Seishi Kikuchi, Hiroo Aoki—108(L)
Scattering by He, H. Staub, W. E. Stephens—131; 235(A)
Scattering in ortho- and parahydrogen, L. W. Alvarez, K. S. Pitzer—596(A)
Slowing down by heavy nuclei, G. Placzek—1138(A)
Transmission of medium fast neutrons, R. B. Roberts, P. Wang—596(A)
Transmission through crystals, M. D. Whitaker, H. G. Beyer—1101(L)
Yields from p-n reactions in Li and Be, J. E. Hill—1117(A)

Nuclear moments and spin (see also **Hyperfine structure**)
Basis of α-particle model, R. G. Sachs—825; 1131(A)
Of Be^9, P. Kusch, S. Millman, I. I. Rabi—666(L)
Of Cs, P. Kusch, S. Millman—596(A)
And liquid-drop model, K. Way—963
Of Mn, R. A. Fisher, E. R. Peck—270
From multiplets, R. A. Fisher—1112(A)
Of N^{14}, Na^{23}, K^{39} and Cs^{133}, P. Kusch, S. Millman, I. I. Rabi—1176
Of H^1 and H^2, J. M. B. Kellogg, I. I. Rabi, N. F. Ramsey, Jr., J. R. Zacharias—318(L); 595(A)
Quadrupole moment of In^{115}, D. R. Hamilton, N. A. Renzetti—680(A)
Resonance experiments on H_2 and D_2, I. I. Rabi, J. R. Zacharias, N. F. Ramsey, Jr., J. M. B. Kellogg—595(A)
Rotational magnetic moment of H_2 and D_2, N. F. Ramsey, Jr.—595(A)
Of Rb and Cl, P. Kusch, S. Millman—680(A)
Signs of nuclear magnetic moments by molecular beam, S. Millman—628
Of Na^{23} and K^{39}, S. Millman, P. Kusch—596(A)
Of $_3Li^6$, $_3Li^7$ and $_9F^{19}$, I. I. Rabi, S. Millman, P. Kusch, J. R. Zacharias—526

Nuclear structure (see also **Disintegration of nucleus**)
Analysis of binding energies, W. H. Barkas—691
Binding energy of H^3, F. T. Rogers, Jr., M. M. Rogers—106(L); 263
Binding energy of He^5, W. A. Tyrrell, Jr.—678(A)
Binding energy of He^6, H. Margenau—678(A); 1173
Energy of isobaric nuclei, J. G. Fox, E. C. Creutz, M. G. White, L. A. Delsasso—1106
Binding energy of Li^7, K. G. Carroll—1128(A)
Energies of light nuclei, W. A. Tyrrell, Jr., K. G. Carroll, H. Margenau—790(L)
Energy of $4n$-nuclei, B. O. Grönblom, R. E. Marshak—229(L)
Energy levels in B^{10}, P. G. Kruger, F. W. Stallmann, W. E. Shoupp—1129(A)
Energy levels of H^3, He^3 and He^4, K. Way—678(A)
Excited state of C^{13}, J. R. Richardson—1129(A)
γ-radiation from B, E. R. Gaerttner, W. A. Fowler, C. C. Lauritsen—27; J. Halpern, H. R. Crane—415(L)
γ-rays from Al, G. J. Plain, R. G. Herb, R. E. Warren—1135(A)
Internal conversion of γ-rays, S. M. Dancoff, P. Morrison—122
Iteration method, oxygen problem, G. Horvay—70; 604(A)
Liquid-drop model, K. Way—963
Many-body interactions in nuclear systems, H. Primakoff, T. Holstein—1218
Meson potentials, G. Breit, L. E. Hoisington, S. S. Share, H. M. Thaxton—1103(L); S. Share, L. E. Hoisington, G. Breit—1130(A)
Meson theory of nuclear forces, H. A. Bethe—1130(A); 1261
Nuclear forces from field theories, E. Feenberg—602(A)
Nuclear models, H. Brown, D. R. Inglis—1182
Quadrupole moment of H^2, R. F. Christy, S. Kusaka—665(L)
Range of forces, D. R. Inglis—988(L)
Related magnetic moments, D. R. Inglis—329
Resonance levels of I and In, J. Hornbostel, F. A. Valente—108(L)
Shape and stability of heavy nuclei, E. Feenberg—504(L); G. Young—1102(L)
Stability of $_4Be^8$, S. K. Allison, E. R. Graves, L. S. Skaggs, N. M. Smith, Jr.—107(L)
Widths of energy levels, J. H. Manley, H. H. Goldsmith, J. Schwinger—39

Optical constants and properties
Dispersion of water, L. L. Skolil—880(L)
Infra-red pleochroism, CH_2 groups, J. W. Ellis, J. Bath—1098
Of K at low temperatures, D. M. Packer—1121(A)
Reflecting power of multilayer films, C. H. Cartwright, A. F. Turner—1128(A)
Reflection from glass, multilayer films, C. H. Cartwright, A. F. Turner—675(A)
Reflectivities of evaporated metal films, G. B. Sabine—1064
Scattering of light by water, L. H. Dawson, E. O. Hulburt—1128(A)

Optical theory
Wide-angle interference experiments, F. W. Doermann, O. Halpern—486; 681(A)

Packing fraction (see also **Isotopes**)
Of heavy elements, A. C. Graves—863

Paschen-Back effect
Of Ne, J. B. Green, J. A. Peoples, Jr.—1147(A)

Phosphorescence
Decay after electron bombardment, R. B. Nelson, R. P. Johnson—592(A)
Decay of willemite, R. P. Johnson—881(L)
Light output and current density, E. G. Ramberg, G. A. Morton—409(L)

Photoconductivity
Of crocoite crystals, J. J. Brady, W. H. Moore—424(A)
Of metal films, T. C. Wilson—316(L)
Photoelectric effect and properties; cells
Of the deuteron, L. Eisenbud—1129(A)
Surface and volume emission from Ba, R. J. Cashman, E. Bassoe—63
Photoionization
γ-ray ion currents in air, J. W. Broxon, G. T. Merideth—883
Photovoltaic effect
Actinoelectric effects in tartaric acid crystals, J. J. Brady, W. H. Moore—308
Piezoelectric effect
Constants of Rochelle salt, W. P. Mason—775; 1141(A)
Striated luminous glow on quartz, J. R. Harrison, I. P. Hooper—674(A)
Positrons
Creation by fast electrons, H. R. Crane, J. Halpern—838
Proceedings of the American Physical Society
Chicago Meeting, November 25–26, 1938—232
Los Angeles Meeting, December 19, 1938—420
New York State Section, November 5, 1938—513
Washington, D. C., Meeting, December 27–29, 1938—589
New York Meeting, February 23–25, 1939—671
Metropolitan Section, March 24, 1939—801
Washington, D. C., Meeting, April 27–29, 1939—1109

Quantum mechanics (see **Mechanics, quantum**)
Quenching of radiation
Of Hg resonance radiation, L. O. Olsen—1126(A)

Radiation
Emissivity of tantalum, L. Malter, D. B. Langmuir—743
Radio
Absorption and reradiation by resonators, C. R. Fountain, E. G. Pigg—592(A)
Nature of fade-out, L. V. Berkner—536; D. F. Martyn—983(L)
Oscillation of close-coupled circuits, R. R. Ramsey, W. L. Chenault, L. E. Long—239(A)
Velocity of waves, G. H. Brown—1100(L); A. L. Vitter, L. C. Brieger—416(L)
Radioactivity (see also **Disintegration of nucleus**)
Activity of Mn by H^1, A. Hemmendinger—604(A)
Of Sb, J. J. Livingood, G. T. Seaborg—414(L)
Of Be^7, J. E. Hill, G. E. Valley—678(A)
β- and γ-ray spectra of Cu^{64} and Eu^{152}, A. W. Tyler—1136(A)
β-decay of N^{13}, B. O. Grönblom—1130(A)
β-radiations of Rb, W. F. Libby, D. D. Lee—245
β-ray spectra of P, Na and Co, J. L. Lawson—1136(A)
β-ray spectrum of N^{13}, E. M. Lyman—234(A); 1123(A)
β-ray theory, A. I. Alichanian, V. Berestezky—978(L)
β-rays of mesothorium and RaD, D. D. Lee, W. F. Libby—252
β-rays from K, W. J. Henderson—238(A)
β-spectra of I, G. F. Tape—1135(A)
β-spectrum of ThC″ and ThB, A. Zavelsky—317(L)
Of Br^{80}, D. C. DeVault, W. F. Libby—322(L)
Of Cd and In, J. M. Cork, J. L. Lawson—1136(A)
Coincidences between β-rays and γ-rays, L. M. Langer, A. C. G. Mitchell, P. W. McDaniel—1123(A)
Constancy of activity of K^{40}, A. K. Brewer—669(L)
Double β-disintegration, theory of neutrino, W. H. Furry—602(A)
Effect of cosmic rays, W. R. Smythe—316(L)
Einstein's field equations for spheres of fluid, R. C. Tolman—364
Equilibrium of spheres, G. M. Volkoff—413(L)
Excitation of In by x-rays, G. B. Collins, B. Waldman, E. M. Stubblefield, M. Goldhaber—507(L); 1129(A)
Excitation by neutrons, M. Goldhaber, R. D. Hill, L. Szilard—47
Excitation by protons, S. W. Barnes, P. W. Aradine—50
Of fission products from U, P. Abelson—670(L); G. N. Glasoe, J. Steigman—982(L); E. McMillan—510(L)
γ-radiation from Co, B. R. Curtis—1136(A)
γ-rays from Au^{198}, Eu^{152}, Ag^{106}, Cu^{64} and N^{13}, J. R. Richardson—609
γ-rays from RaE, J. A. Gray—586(L)
Geological age measurements, A. V. Grosse—584(L); A. O. Nier—153
Induced by $_1H^1$ in Cu, Ni, Ag, A and Mo, L. A. Delsasso, L. N. Ridenour, R. Sherr, M. G. White—113
Induced in Cd and In by H^1, S. W. Barnes—241(A)
Interval conversion electrons from Br^{80}, G. E. Valley, R. L. McCreary—666(L)
Of Fe^{55}, J. J. Livingood, G. T. Seaborg—1268(L)
Isomerism and chemical separation in Te, G. T. Seaborg, J. W. Kennedy—410(L)
Isomerism in $_{43}$Ma, G. T. Seaborg, E. Segrè—808
Isomers of Br, L. I. Roussinov, A. A. Yusephovich—979(L)
Of isomers of Ag^{106}, T. Enns—1118(A)
Isomers of Sr, D. W. Stewart—674(A)
Isotopes of Cu, Zn, Ga and Ge, R. Sagane—31
Isotopes of element 43, B. N. Cacciapuoti—110(L)
Isotopes of Zn, J. J. Livingood, G. T. Seaborg—457
Of Li^8, C. Kittel—515
Of Mo, D. Ewing, T. Perry, R. McCreary—1136(A)
Natural fission of Th and U, W. F. Libby—1269(L)
Periods of Sn, J. J. Livingood, G. T. Seaborg—667(L)
K-electron capture in Ag^{106}, J. R. Richardson—236(A)
Probability of p–n and p–γ reactions, C. V. Strain—679(A)
Production by α-particles, L. D. P. King, W. J. Henderson, J. R. Risser—1118(A)
Radioactive content of atmosphere, G. R. Wait—591(A)
Radon content of spring waters, J. L. Bohn, F. H. Nadig—685(A)
Recoil of nucleus in β-disintegration, J. Halpern, H. R. Crane—1123(A)
Of Re, K. Sinma, F. Yamasaki—320(L)
Of Te; isomers, G. T. Seaborg, J. J. Livingood, J. W. Kennedy—794(L)
Raman spectra
Depolarization factors, F. F. Cleveland, M. J. Murray, J. Shackelford, H. H. Haney—1146(A)

Depolarization measurements, F. F. Cleveland, M. J. Murray—1113(A)
In difluorochloromethane, G. Glockler, J. H. Bachmann —669(L)
Of fluorochloromethane, G. Glockler, J. H. Bachmann—1273(L)
Of gaseous amines, J. S. Kirby-Smith, L. G. Bonner—1114(A)
Of phenyl-1-propyne-1 and chloro-2-phenyl-1-acetylene, F. F. Cleveland, M. J. Murray—600(A)

Relativity
Equilibrium of spheres, J. R. Oppenheimer, G. M. Volkoff—374; R. C. Tolman—364; G. M. Volkoff—413(L); 421(A)
General theory and flat space, N. Rosen—681(A)
Modification of special relativity, C. H. Page—1131(A)

Resistance, electrical (see **Electrical conductivity and resistance**)

Resonance radiation
Of Hg, quenching, L. O. Olsen—1126(A)

Scattering of atoms and molecules (see also **Atomic and molecular beams**)
Of K and K_2 in gases, P. Rosenberg—1267(L)

Scattering of electrons, neutrons and ions (see also **Electrons, scattering of; Electron diffraction**)
Analysis of scattering of H^1 by H^1, G. Breit, H. M. Thaxton, L. Eisenbud—603(A); 1018
Angular distribution of neutrons, Seishi Kikuchi, Hiroo Aoki, Tetuo Wakatuki—1264(L)
Cross sections of metallic U for neutrons, M. D. Whitaker, C. A. Barton, W. C. Bright, E. J. Murphy—793(L)
Cross sections for slow neutrons, M. D. Whitaker, H. G. Beyer—1124(A)
Depolarization effects for electrons, M. E. Rose, H. A. Bethe—601(A)
Determination of force fields, F. C. Hoyt—664(L)
Of D–D neutrons, S. Seely, W. H. Zinn, V. W. Cohen—679(A)
Electron scattering, radiative corrections, S. M. Dancoff —959
Erratum: The scattering of α-particles by argon, oxygen, and neon, G. Brubaker—877(L)
Of fast β-particles by nuclei, F. C. Champion, A. Barber —111(L)
Of fast electrons in gases, J. H. Bartlett, R. E. Watson—235(A); A. L. Hughes—350
Of fast neutrons, Hiroo Aoki—795(L)
Of fast neutrons by Pb, R. F. Bacher—679(A)
Internal scattering of β-rays, G. E. M. Jauncey—237(A)
Neutron-alpha and alpha-proton scattering, H. Primakoff, H. H. Goldsmith—1117(A)
Neutron-proton cross section, L. Simons—792(L)
Of neutrons in crystals, O. Halpern, M. Hamermesh, M. H. Johnson—1125(A)
Of neutrons in ferromagnetics, temperature dependence, F. Bloch—1118(A)
Of neutrons in He, W. E. Shoupp, P. G. Kruger, F. W. Stallmann, G. H. Gamertsfelder—1118(A); H. Staub, W. E. Stephens—131; 235(A)
Of neutrons by H_2 and D_2, M. Hamermesh, J. Schwinger —679(A)
Of neutrons by protons, V. W. Cohen, H. H. Goldsmith —597(A); E. O. Salant, R. B. Roberts, P. Wang—984(L)
Of neutrons by ortho- and parahydrogen, L. W. Alvarez, K. S. Pitzer—596(A); W. F. Libby, E. A. Long—339
Polarization, absence of, M. E. Rose, H. A. Bethe—277
Proton-proton scattering, N. P. Heydenburg, L. R. Hafstad, M. A. Tuve—603(A)
Proton-proton scattering, experimental, R. G. Herb, D. W. Kerst, D. B. Parkinson, G. J. Plain—603(A); 998
Of H^1 by Li, E. C. Creutz—679(A); 819
Of slow neutrons by U, H. H. Goldsmith, V. W. Cohen, J. R. Dunning—1124(A)

Secondary electrons (see **Electrons, secondary**)

Solid state (see **Crystalline state**)

Spark discharge (see **Discharge of electricity, etc.**)

Specific heat
Of monatomic liquids, W. J. Archibald—1139(A)
Of Ta, D. B. Langmuir, L. Malter—1138(A)

Spectra, absorption
Of NH_3 perpendicular vibrations, E. F. Barker—657
Of fatty acids, infra-red, R. C. Herman, R. Hofstadter—683(A)
Of heavy benzene at 2730–2250A, H. Sponer—683(A)
Of heavy water vapor, N. Fuson, H. M. Randall, D. M. Dennison—590(A)
Of HS, M. N. Lewis, J. U. White—894
Of hydroxyl groups, infra-red, J. W. Ellis—597(A)
Intensities in benzene vapor, C. A. Beck, W. F. Radle—1120(A)
Of liquid water at 2.52μ, J. R. Collins—470
Of methylamine, infra-red, L. G. Bonner, A. P. Cleaves, H. Sponer—1113(A); A. P. Cleaves, E. K. Plyler—1113(A); R. G. Owens, E. F. Barker—1119(A)
Of phenol vapor, infra-red, V. Williams, R. C. Herman, R. Hofstadter—684(A)
Of silver halides, N. Metropolis, H. Beutler—1113(A)
Of Ag I, ultraviolet, N. Metropolis—239(A); 636
Of substituted benzenes, A. L. Sklar—1120(A)
Of thiocyanates, D. Williams—1120(A)

Spectra, atomic
Of Ce II, W. E. Albertson, G. R. Harrison—1119(A)
Excitation of O^{++}, M. H. Hebb—1114(A)
Fine structure of Hα and Dα, S. Pasternack—421(A); C. F. Robinson—423(A)
Fine structure of λ4686 of He II, Djen-Yuen Chu—423(A)
Intensities of singlet-singlet and singlet-triplet transitions, G. W. King, J. H. Van Vleck—1120(A)
Lines and terms in ionized K, Cu, Sc and Ti, L. W. Phillips—708
New terms in Fe, L. C. Green—1209
Nitrogen forbidden line, R. Bernard—511(L); J. Kaplan —598(A)
Of K, Ca and Sc, P. G. Kruger, L. W. Phillips—352
Recombination spectrum of Hg, R. C. Garth, G. E. Moore, H. W. Webb—677(A); energy distribution —677(A)

Spectra, atomic (continued)
Self-consistent field for Cr II, R. L. Mooney—557; 598(A)
Of V I in violet, C. E. Moore—710
Spectra, general
Intensity of lines in Hg arc, O. S. Duffendack, O. G. Koppius—1199
Spectra, molecular (see also **Molecular structure and constants**)
Of H_2 and D_2, H. M. James, A. S. Coolidge—184; 234(A)
Intensities in halide spectra, R. S. Mulliken—239(A)
Intensities in H_2 spectrum, N. Ginsburg—1112(A)
Interaction between rotation and oscillation, H. H. Nielsen—289
Magnetic rotation spectra of SO_2 and CS_2, P. Kusch, F. W. Loomis—850
Of $N^{15}H$, $N^{15}D$ and N^{15}, R. W. Wood, G. H. Dieke—1120(A)
In N_2, O. R. Wulf, E. H. Melvin—600(A); 687
NH bands in night sky, J. Kaplan—583(L)
Of SnH, W. W. Watson, R. Simon—358
Vibration-rotation energies in XY_4, W. H. Shaffer, H. H. Nielsen, L. H. Thomas—878(L)
Of SnH and PbH, W. W. Watson, R. Simon—677(A)
Spectroscopy, technique
Spectrophotometer, infra-red, J. D. Hardy, A. I. Ryer—1112(A)
Spinor analysis
Fundamental space-time coordinates, E. E. Witmer—1132(A)
Structure factor
For zinc crystals, E. M. McNatt, G. E. M. Jauncey—237(A)
Superconductivity (see **Electrical conductivity**)

Thermal conductivity
Of metallic contacts, C. Starr, R. B. Jacobs—684(A)
Of solid or molten metals, C. C. Bidwell—1139(A)
Thermionic emission of electrons; Emitting surfaces
Thermionic cathode for gaseous discharge tubes, A. W. Hull—1145(A)
Time changes in oxide-coated cathodes, J. P. Blewett—713
Of W for various crystallographic directions, M. H. Nichols—1144(A)
Thermodynamics
Equilibrium and microscopic entropy, E. C. Kemble—602(A)

Van der Waals forces
In B molecule, J. K. Knipp—601(A)
And calculation of polarizabilities, J. K. Knipp—1244
In He, H. Margenau—1137(A)
Repulsive forces in adsorption, W. G. Pollard—1137(A)
Vapor pressure
Of BaO, J. P. Blewett, H. A. Liebhafsky, E. F. Hennelly—1138(A)
Virial coefficient
Of He gas for the lowest measured temperature, L. Gropper—1095
Viscosity
Of air, E. L. Harrington—230(L)
In an expanding bubble, E. C. Westerfield, W. B. Pietenpol—306
In two-dimensional systems, E. Boyd, W. D. Harkins—1131(A)

X-rays, absorption
Chemical binding and absorption edges, R. Landshoff—631
Of Fe, Ni, Cu and Zn, H. Friedman, W. W. Beeman—1115(A)
L_{III} absorption of I, Ba, and Ba compounds, E. H. Green—1072
X-rays, diffraction, scattering, reflection, refraction and polarization
Diffraction by liquid ethyl alcohol, G. G. Harvey—1115(A)
Diffraction by liquid K, N. S. Gingrich, C. N. Wall—1116(A)
Diffraction by liquid sulphur, N. S. Gingrich—236(A)
Diffraction by liquid Sn and liquid Cl, C. Gamertsfelder—1116(A)
Diffuse scattering from single crystals, O. J. Baltzer, E. M. McNatt—237(A)
Diffuse scattering from Zn, G. E. M. Jauncey, E. M. McNatt—498
Discontinuities in diffuse scattering, G. G. Harvey—1147(A)
Dynamical theory, W. H. Zachariasen—241(A)
Laue patterns, effect of quartz filters, G. W. Fox, D. W. Stebbins—405
Particle size determination, C. Nusbaum—1115(A)
Trigonometric interpolation, C. Lanczos, G. C. Danielson—242(A)
X-rays, emission (see also **X-rays, spectra and spectroscopy**, etc.)
$L\alpha$ satellites, R. E. Shrader, F. K. Richtmyer—605(A)
$L\alpha$ satellites, L. G. Parratt, C. A. Randall—1114(A)
K ionization of Ni, D. L. Webster, L. T. Pockman, K. Harworth, P. Kirkpatrick—682(A)
Ag L-series lines from K Auger transitions, C. J. Burbank—421(A)
Spectra of valence electrons, H. W. B. Skinner, H. M. O'Bryan—604(A)
X-rays, tubes, apparatus
High vacuum spectrometer, J. H. Munier—1116(A)
Measurement of x-ray production, M. I. T. generator, L. C. Van Atta, D. L. Northrup—681(A)
Memorial Hospital installation, G. Failla—677(A)
Pressure-insulated electrostatic x-ray generator, J. G. Trump, R. J. Van de Graaff—676(A)

Zeeman effect
At fields of 100,000 gauss, G. R. Harrison, F. Bitter—1125(A)
Forbidden lines of K, F. A. Jenkins, E. Segrè—545
Quadratic effect, F. A. Jenkins, E. Segrè—52; 420(A); theory, L. I. Schiff, H. Snyder—59; 421(A)
Theory of Paschen-Back, J. B. Green, J. F. Eichelberger—1126(A)
In W; line λ4659, J. H. Roberson, J. E. Mack—1126(A)

VOLUME 55 SECOND SERIES

CONTENTS

JANUARY 1, 1939

Galactic Rotation and the Intensity of Cosmic Radiation at the Geomagnetic Equator . . . M. S. VALLARTA, C. GRAEF AND S. KUSAKA 1
Nature of the Penetrating Cosmic Rays . . . VOLNEY C. WILSON 6
Critical Analysis for Sidereal Time Variations of Cosmic Rays on the Pacific . . . JULIAN L. THOMPSON 11
On the Penumbra of Cosmic Radiation . . . R. ALBAGLI HUTNER 15
New Evidence for the Existence of Penetrating Neutral Particles . . . FRANCIS R. SHONKA 24
Gamma-Radiation from Boron Bombarded by Deuterons . . . E. R. GAERTTNER, W. A. FOWLER AND C. C. LAURITSEN 27
Radioactive Isotopes of Cu, Zn, Ga and Ge . . . R. SAGANE 31
Widths of Nuclear Energy Levels . . . J. H. MANLEY, H. H. GOLDSMITH AND JULIAN SCHWINGER 39
Radioactivity Induced by Nuclear Excitation. I. Excitation by Neutrons . . . M. GOLDHABER, R. D. HILL AND LEO SZILARD 47
Radioactivity Induced by Nuclear Excitation. II. Excitation by Protons . . . S. W. BARNES AND P. W. ARADINE 50
Quadratic Zeeman Effect . . . F. A. JENKINS AND E. SEGRÈ 52
Theory of the Quadratic Zeeman Effect . . . L. I. SCHIFF AND H. SNYDER 59
Surface and Volume Photoelectric Emission from Barium . R. J. CASHMAN AND ELSE BASSOE 63
On the Iteration Method and Its Application to the Oxygen Problem . . GABRIEL HORVAY 70
Dissipative Acoustic Reflection Coefficients in Gases by Ultrasonic Interferometry . . . R. S. ALLEMAN 87
Field Theory of Elementary Particles . . . N. ROSEN 94

Letters to the Editor:

On the Change of Magnetic Properties of the Single Crystal of Nickel Due to Temperature . . . T. OKAMURA AND T. HIRONE 102
Energy Production in Stars . . . H. A. BETHE 103
Difference in the Absorption of Cosmic Rays in Air and Water and the Instability of the Barytron . . . THOMAS H. JOHNSON AND MARTIN A. POMERANTZ 104
Ferromagnetism of Semi-Conductors . . . SYÔHEI MIYAHARA 105
Mesotron as the Name of a New Particle . . . ROBERT A. MILLIKAN 105
New Determination of the Binding Energy of the Deuteron . . . F. T. ROGERS, JR. AND MARGUERITE M. ROGERS 106
Neutron-Proton Scattering Cross Section . . . VICTOR W. COHEN, H. H. GOLDSMITH AND JULIAN SCHWINGER 106
Resonance Absorption of Slow Neutrons in Indium . . . J. H. MANLEY, H. H. GOLDSMITH AND JULIAN SCHWINGER 107
Precise Measurement of the Mass Difference $_4Be^9$—$_4Be^8$; The Stability of $_4Be^8$ . . . SAMUEL K. ALLISON, ELIZABETH R. GRAVES, LESTER S. SKAGGS AND NICHOLAS M. SMITH, JR. 107
On the Resonance Levels for Neutron Capture of Iodine and Indium . . . J. HORNBOSTEL AND F. A. VALENTE 108
Scattering of the D—D Neutrons . . . SEISHI KIKUCHI AND HIROO AOKI 108
New Periodic Orbit in the Field of a Magnetic Dipole . . . R. ALBAGLI HUTNER 109
Dellinger Phenomenon . . . JOSEPH KAPLAN 110
Radioactive Isotopes of Element 43 . . . B. N. CACCIAPUOTI 110
Comment on a Paper by W. E. Bowls, "Second Townsend Coefficient" . . . JOSEPH KAPLAN 111
Elastic Scattering of Fast β-Particles by Atomic Nuclei . . . F. C. CHAMPION AND A. BARBER 111
Absorption of Slow Neutrons of Different Energies by B, Co and Mn . . . E. O. SALANT, W. J. HORVATH AND H. I. ZAGOR 111
Remark on the Latitude Effect of Cosmic Rays . . . B. GROSS 112

JANUARY 15, 1939

Artificial Radioactivity Produced by Protons . . . L. A. DELSASSO, L. N. RIDENOUR, R. SHERR AND M. G. WHITE 113
Calculation of Internal Conversion Coefficients . . . S. M. DANCOFF AND P. MORRISON 122
Anomalous Scattering of Neutrons by Helium . . . H. STAUB AND W. E. STEPHENS 131
Angular Distribution of the Disintegration Products of Light Elements . . . R. O. HAXBY, J. S. ALLEN AND J. H. WILLIAMS 140

Note on the Disintegration of Boron by Protons . . . . . E. L. Hill and R. O. Haxby 147
Isotopic Constitution of Uranium and the Half-Lives of the Uranium Isotopes. I . . . . . Alfred O. Nier 150
Isotopic Constitution of Radiogenic Leads and the Measurement of Geological Time. II . . . . . Alfred O. Nier 153
Sensitized Fluorescence of Potassium . . . . . Ernst H. Krause 164
Hyperfine Structure of Gold . . . . . R. M. Elliott and J. Wulff 170
Fine Structure of the Line λ4686 of Ionized Helium . . . . . Djen-Yuen Chu 175
Infra-Red Spectrum and Molecular Constants of Carbon Monoxide . . . . . S. E. Whitcomb and R. T. Lagemann 181
Continuous Spectra of H_2 and D_2 . . Hubert M. James and Albert Sprague Coolidge 184
Capture of Neutrons by Atoms in a Crystal . . . . . Willis E. Lamb, Jr. 190
Convection Currents in Arcs in Air . . . . . C. G. Suits 198
Probability of Ionization of Mercury Atoms by Collision with Low Velocity Electrons . . . . . Maurice E. Bell 201
Ionization and Excitation in Mercury Vapor Produced by Electron Bombardment . . . . . W. B. Nottingham 203
Spark Breakdown Potentials as a Function of the Product of the Pressure by the Plate Separation in A, N_2 and H_2 for Pt and Na Cathodes . . . . . Florence Ehrenkranz 219

Letters to the Editor:

New Form of Band Igniter for Mercury-Pool Tubes . . . . . Kenneth J. Germeshausen 228
Silver Films on a Mica Crystal Face . . . . . Sanford Essig 229
Binding Energy of $4n$-Nuclei on the α-Particle Model . . B. O. Grönblom and R. E. Marshak 229
Viscosity of Air . . . . . E. L. Harrington 230
Self-Diffusion in Copper . . . . . B. V. Rollin 231

Proceedings of the American Physical Society

Chicago Meeting, November 25–26, 1938; Minutes and Abstracts 1–48; Author Index 232

February 1, 1939

Energies of the Soft Beta-Radiations of Rubidium and Other Bodies. Method for their Determination . . . . . W. F. Libby and D. D. Lee 245
Beta-Rays of Mesothorium 1 and Radium D . . . . . D. D. Lee and W. F. Libby 252
Absorption Coefficient of 5.8-Mev Gamma-Radiation in Aluminum . . . . . J. Halpern and H. R. Crane 258
Pair Internal Conversion Coefficient in the F+H′ Reaction and Measurements on the Gamma-Ray Spectrum . . . . . J. Halpern and H. R. Crane 260
Independent Determination of the Binding Energy of the Deuteron . . . . . F. T. Rogers, Jr. and Marguerite M. Rogers 263
Hyperfine Structure of Manganese I and Nuclear Magnetic Moment . . . . . Russell A. Fisher and Edson R. Peck 270
On the Absence of Polarization in Electron Scattering . . . M. E. Rose and H. A. Bethe 277
Interaction Between Rotation and Oscillation in Deutero-Formaldehyde . Harald H. Nielsen 289
Temperature Distribution in the High Pressure Mercury Discharge Tube . . W. Elenbaas 294
Study of Beta-Brass in Single Crystal Form . . . . . Wayne Webb 297
Viscosity in an Expanding Bubble . . . Everett C. Westerfield and W. B. Pietenpol 306
Actinoelectric Effects in Tartaric Acid Crystals . James J. Brady and William H. Moore 308
Shape of the Domains in Ferromagnetics . . . . . E. H. Kennard 312

Letters to the Editor:

On the Interchange Energy of Two Free Electrons . . . . . Carl A. Ludeke 315
Cosmic Rays and Radioactive Potassium . . . . . W. R. Smythe 316
Photoconductivity of Metal Films . . . . . Thomas C. Wilson 316
On the Upper Limit of the β-Spectrum of ThC″ and ThB . . . . . A. Zavelsky 317
Electrical Quadrupole Moment of the Deuteron . . . . . J. M. B. Kellogg, I. I. Rabi, N. F. Ramsey, Jr. and J. R. Zacharias 318
Thermal Dilatation of Superconductors . . . . . E. C. Westerfield 319
β-Radioactivities of Rhenium . . . . . K. Sinma and F. Yamasaki 320
Effect of Hydroxyl Ion Concentration (or of pH) on the Film Potentials of Multilayers . . . . . William D. Harkins and Richard W. Mattoon 320
Chemical Separation of Nuclear Isomers . . E. Segrè, R. S. Halford and G. T. Seaborg 321
Evidence for the Gamma-Radioactivity of a 4.5-hour Br^{80} from Radiobromate . . . . . Don C. DeVault and W. F. Libby 322

FEBRUARY 15, 1939

Efficiency of Production of Short Range Particles from Lithium and of 4.4-cm Alpha-Particles from Boron Under Proton Bombardment . . . . . RALPH B. BOWERSOX 323
On Interpreting Related Magnetic Moments of Light Nuclei . . . . . D. R. INGLIS 329
Emission of Secondary Electrons from Metals Bombarded with Protons . . JAMES S. ALLEN 336
Scattering of Slow Neutrons by Gaseous Ortho- and Parahydrogen: Spin Dependence of the Neutron-Proton Force . . . . . W. F. LIBBY AND EARL A. LONG 339
Atomic Electron Velocities in Nitrogen and Methane . A. L. HUGHES AND MERLE A. STARR 343
Scattering of Fast Electrons in Gases . . . . . A. L. HUGHES 350
Sodium-Like Spectra of Potassium, Calcium and Scandium . . . . . P. GERALD KRUGER AND L. W. PHILLIPS 352
Spectrum of Tin Hydride at High Pressure . . WILLIAM W. WATSON AND RALPH SIMON 358
General Solution for the Equations of Natural Line Breadth . . . . LYMAN SPITZER, JR. 361
Static Solutions of Einstein's Field Equations for Spheres of Fluid . . RICHARD C. TOLMAN 364
On Massive Neutron Cores . . . . . J. R. OPPENHEIMER AND G. M. VOLKOFF 374
Mechanism of the Positive Point-to-Plane Corona in Air at Atmospheric Pressure . . . . . G. W. TRICHEL 382
Use of Interference to Extinguish Reflection of Light from Glass . KATHARINE B. BLODGETT 391
Effect of Quartz Filters on the Distribution of Energy in Laue Patterns . . . . . GERALD W. FOX AND DEAN W. STEBBINS 405

Letters to the Editor:

Variation of Light Output with Current Density and Classification of Willemite Phosphors . . . . . E. G. RAMBERG AND G. A. MORTON 409
Inner, Initial Permeability of Iron and Nickel from 98 to 410 Megacycles . . . . . J. BARTON HOAG AND N. GOTTLIEB 410
Nuclear Isomerism and Chemical Separation of Isomers in Tellurium . . . . . G. T. SEABORG AND J. W. KENNEDY 410
Note on the Biological Effects of Densely Ionizing Radiation . . . . . K. G. ZIMMER AND N. W. TIMOFÉEFF-RESSOVSKY 411
Theory of Electrodisintegration of Beryllium . . . . . EUGENE GUTH 411
Electrodisintegration of Beryllium . . . . . GEORGE B. COLLINS, BERNARD WALDMAN AND WILLIAM R. POLYE 412
Advantages of Scaling Circuits in Recording Random Counts . . . . . HAROLD LIFSCHUTZ AND O. S. DUFFENDACK 412
On the Equilibrium of Massive Spheres . . . . . G. M. VOLKOFF 413
Latitude Effect for Very Large Cosmic-Ray Bursts . . WILLIAM P. JESSE AND PIARA S. GILL 414
Radioactive Antimony from I+n and Sn+D . . . . . J. J. LIVINGOOD AND G. T. SEABORG 414
Gamma-Rays from B+D . . . . . J. HALPERN AND H. R. CRANE 415
Velocity of Radio Waves in Air . . . . . A. L. VITTER AND L. C. BRIEGER 416
Droplet Fission of Uranium and Thorium Nuclei . . . . . R. B. ROBERTS, R. C. MEYER AND L. R. HAFSTAD 416
Heavily Ionizing Particles from Uranium . . . . . G. K. GREEN AND LUIS W. ALVAREZ 417
Intensely Ionizing Particles Produced by Neutron Bombardment of Uranium and Thorium . . . . . R. D. FOWLER AND R. W. DODSON 417
Cleavage of the Uranium Nucleus . . . . . PHILIP ABELSON 418
Resonance in Uranium and Thorium Disintegrations and the Phenomenon of Nuclear Fission . . . . . N. BOHR 418

Proceedings of the American Physical Society:

Los Angeles Meeting, December 19, 1938; Minutes and Abstracts 1–19; Author Index 420

MARCH 1, 1939

On the Motion of Cosmic Rays in Interstellar Space . . . . . HANNES ALFVÉN 425
Long Period Variations of Cosmic Rays . . . . . PIARA S. GILL 429
Energy Production in Stars . . . . . H. A. BETHE 434
Radioactive Isotopes of Zinc . . . . . J. J. LIVINGOOD AND G. T. SEABORG 457
Emission of Secondary Electrons Under High Energy Positive Ion Bombardment . . . . . A. G. HILL, W. W. BUECHNER, J. S. CLARK AND J. B. FISK 463
New Infra-Red Absorption Band of Liquid Water at 2.52μ . . . . . J. R. COLLINS 470
Energy Distribution in Field Emission . . JOSEPH E. HENDERSON AND R. K. DAHLSTROM 473
Sparking Potentials at Low Pressures . . . . . ROBERT B. QUINN 482

Theoretical Evaluation of a Wide-Angle Interference Experiment . . . . . F. W. DOERMANN AND O. HALPERN 486
On the Origin of the Earth's Magnetic Field . . . . . WALTER M. ELSASSER 489
Thermal Vibrations and Atomic Structure of Zinc Crystals at 100° and 298°K . . . . . G. E. M. JAUNCEY AND E. M. MCNATT 498
Attempt to Observe the Absorption of Neutrinos . . . . . H. R. CRANE 501

Letters to the Editor:

East-West Asymmetry of the Cosmic Radiation at Very High Elevations Near the Equator . . . . . T. H. JOHNSON AND J. G. BARRY 503
Electrical Discharge Between a Stationary and a Rotating Electrode . . . . . J. W. BEAMS AND L. B. SNODDY 504
On the Shape and Stability of Heavy Nuclei . . . . . EUGENE FEENBERG 504
Ferromagnetic Anisotropy in Nickel-Iron Crystals. Evidence for Super-Structure near Ni_2Fe . . . . . L. W. MCKEEHAN AND E. M. GRABBE 505
Lifetime of the Yukawa Particle . . . . . L. W. NORDHEIM 506
Scattering of Cosmic Rays by the Stars of a Galaxy . . M. S. VALLARTA AND R. P. FEYNMAN 506
Nuclear Excitation of Indium by X-Rays . . . . . GEORGE B. COLLINS, BERNARD WALDMAN, EDWARD M. STUBBLEFIELD AND M. GOLDHABER 507
Electro-Optical Effects in Colloids . . . . . HANS MUELLER 508
Note on Reduction for the Rotation Group . . . . . J. M. KELLER 508
Disintegration of Uranium . . . . . D. R. CORSON AND R. L. THORNTON 509
Radioactive Recoils from Uranium Activated by Neutrons . . . . . EDWIN MCMILLAN 510
Further Observations on the Splitting of Uranium and Thorium . . . . . R. B. ROBERTS, R. C. MEYER AND P. WANG 510
Presence of the Nitrogen Forbidden Line $^1P \rightarrow {}^1S$ in the Auroral Spectrum . . . RENÉ BERNARD 511
Fission of Uranium . . . . . H. L. ANDERSON, E. T. BOOTH, J. R. DUNNING, E. FERMI, G. N. GLASOE AND F. G. SLACK 511

Proceedings of the New York State Section of the American Physical Society, November 5, 1938 513

MARCH 15, 1939

Radioactivity of Li^8 . . . . . CHARLES KITTEL 515
Total Secondary Electron Emission from Tungsten and Thorium-Coated Tungsten . . . . . EDWARD A. COOMES 519
Molecular Beam Resonance Method for Measuring Nuclear Magnetic Moments. The Magnetic Moments of $_3Li^6$, $_3Li^7$ and $_9F^{19}$ . . . . . I. I. RABI, S. MILLMAN, P. KUSCH AND J. R. ZACHARIAS 526
Concerning the Nature of Radio Fade-Out . . . . . L. V. BERKNER 536
Zeeman Effect of the Forbidden Lines of Potassium . . . F. A. JENKINS AND E. SEGRÈ 545
Onset Studies of Positive Point-to-Plane Corona in Air at Atmospheric Pressure . . . . . ARTHUR F. KIP 549
Self-Consistent Field for Doubly Ionized Chromium . . . . . ROBERT L. MOONEY 557
High Pressure Arcs in Common Gases in Free Convection . . . . . C. G. SUITS 561
Theory of Reversible Magnetization in Ferromagnetics . . . WILLIAM FULLER BROWN, JR. 568
Noncubic Growth of Single Crystals of Silver by Condensation from Vapor . . J. H. HOWEY 578

Letters to the Editor:

Doppler Effect and Field Distribution in the Hailer Canal-Ray Tube . . . . . C. W. SHERWIN AND A. J. DEMPSTER 582
Are There Multiple Charged Primary Particles in Cosmic Radiation? . . . . M. S. VALLARTA 583
NH Bands in the Night Sky Spectrum . . . . . JOSEPH KAPLAN 583
Spectroscopic and Free Electron Values of e/m . . . . . J. A. BEARDEN 584
Actinium Series of Radioactive Elements and Their Influence on Geological Age Measurements . . . . . ARISTID V. GROSSE 584
On the Mass of the Mesotron . . . . . Y. NISHINA, M. TAKEUCHI AND T. ICHIMIYA 585
γ-Rays of Radium E . . . . . J. A. GRAY 586
Low Energy Neutrons from the Deuteron-Deuteron Reaction . . . . . EMMETT HUDSPETH AND HENRY DUNLAP 587
Note on the Stopping Power of Hydrogen at Very Low Energies . . . . . F. T. ROGERS, JR. 588

Proceedings of the American Physical Society:

Washington, D. C., Meeting, December 27–29, 1938; Minutes and Abstracts 1–79; Author Index . 589

APRIL 1, 1939

Radiations from Radioactive Substances: Au^{198}, Eu^{152}, Ag^{106}, Cu^{64} and N^{13} . . . . . J. REGINALD RICHARDSON 609
Penumbra at Geomagnetic Latitude 20° and the Energy Spectrum of Primary Cosmic Radiation . . . . . R. ALBAGLI HUTNER 614
On Asymptotic Orbits of Primary Cosmic Rays . . . . . ALFREDO BAÑOS, JR. 621
Masses of Li^6, Li^7, Be^8, Be^9, B^{10} and B^{11} . . . . . SAMUEL K. ALLISON 624
On the Determination of the Signs of Nuclear Magnetic Moments by the Molecular Beam Method of Magnetic Resonance . . . . . S. MILLMAN 628
Influence of Chemical Binding and Crystal Structure on X-Ray Absorption Edges . . . . . ROLF LANDSHOFF 631
New Ultraviolet Band System of Silver Iodide . . . . . NICHOLAS METROPOLIS 636
E Region of the Ionosphere . . . . . E. O. HULBURT 639
E Region of the Ionosphere During the Total Solar Eclipse of October 1, 1940 . E. O. HULBURT 646
Rubbed Films of Barium Stearate and Stearic Acid . . . L. H. GERMER AND K. H. STORKS 648
On the Origin of Great Nebulae . . . . . G. GAMOW AND E. TELLER 654
Perpendicular Vibrations of the Ammonia Molecule . . . . . E. F. BARKER 657

Letters to the Editor:

Spark Discharge on Surfaces . . . . . L. B. SNODDY AND J. W. BEAMS 663
Delayed Neutron Emission which Accompanies Fission of Uranium and Thorium . . . . . R. B. ROBERTS, L. R. HAFSTAD, R. C. MEYER AND P. WANG 664
Determination of Force Fields from Scattering in the Classical Theory . . . . . F. C. HOYT 664
Electric Quadrupole Moment of the Deuteron . . . . . R. F. CHRISTY AND S. KUSAKA 665
Interval Conversion Electrons from Br^{80} . . . . . G. E. VALLEY AND R. L. MCCREARY 666
On the Nuclear Magnetic Moment of Beryllium . . . P. KUSCH, S. MILLMAN AND I. I. RABI 666
New Periods of Radioactive Tin . . . . . J. J. LIVINGOOD AND G. T. SEABORG 667
Gamma-Rays from Uranium Activated by Neutrons . . . . . J. C. MOUZON, R. D. PARK AND J. A. RICHARDS, JR. 668
Influence of Frequency on the Electro-Optical Effect in Colloids . . . . . FRANCIS J. NORTON 668
Raman Effect in Difluorochloromethane . . . . . GEORGE GLOCKLER AND J. H. BACHMANN 669
Constancy of K^{40} . . . . . A. KEITH BREWER 669
Further Products of Uranium Cleavage . . . . . PHILIP ABELSON 670

Proceedings of the American Physical Society:

New York Meeting, February 23–25, 1939; Minutes and Abstracts 1–64; Author Index 671

APRIL 15, 1939

Band Spectra in Nitrogen at Atmospheric Pressure. A Source of Band Spectra Excitation . . . . . OLIVER R. WULF AND EUGENE H. MELVIN 687
Analysis of Nuclear Binding Energies . . . . . WALTER H. BARKAS 691
Stark-Effect Broadening of Hydrogen Lines. I. Single Encounters . . LYMAN SPITZER, JR. 699
Supplementary Identifications in the Spectra of K, Ca, Sc and Ti . . . . L. W. PHILLIPS 708
Arc Spectrum of Vanadium in the Violet . . . . . CHARLOTTE E. MOORE 710
Time Changes in Emission from Oxide-Coated Cathodes . . . . . J. P. BLEWETT 713
Physical Possibilities of Stellar Evolution . . . . . G. GAMOW 718
On the Theory and Observation of Highly Collapsed Stars . . . . . F. ZWICKY 726
Resistance, Emissivities and Melting Point of Tantalum . L. MALTER AND D. B. LANGMUIR 743
Rate of Evaporation of Tantalum . . . . . D. B. LANGMUIR AND L. MALTER 748
Pressure-Temperature Phase Diagram of Na-K Alloys and the Effect of Pressure on the Resistance of the Liquid Phase . . . . . C. H. KEAN 750
Townsend Ionization Coefficients in Cs-Ag-O Photo-Tubes Filled with Argon . W. S. HUXFORD 754
Propagation of Electric Currents in Terminated Lines. Solutions of the Telegraphic Equation . . . . . R. H. KENT 762
Transition from Glow Discharge to Arc . . . . . HSU YUN FAN 769
Dynamic Measurement of the Elastic, Electric and Piezoelectric Constants of Rochelle Salt . . . . . W. P. MASON 775

Letters to the Editor:

Binding Energies of Light Nuclei . . . W. A. Tyrrell, Jr., K. G. Carroll and H. Margenau 790
Energy Production in Red Giants . . . . . G. Gamow and E. Teller 791
Electro-Optical Effects in Bentonite Colloids . . . . . Hans Mueller 792
Neutron-Proton Scattering Cross Section . . . . . Lennart Simons 792
Cross Sections of Metallic Uranium for Slow Neutrons . . . . . Martin D. Whitaker, Charles A. Barton, William C. Bright and Edgar J. Murphy 793
Radioactive Tellurium: Further Production and Separation of Isomers . . . . . G. T. Seaborg, J. J. Livingood and J. W. Kennedy 794
Isotopic Constitution of Hafnium, Yttrium, Lutetium and Tantalum . . . Arthur J. Dempster 794
On the Scattering of Fast Neutrons of Different Energy . . . . . Hiroo Aoki 795
Short Range Alpha-Particles from $F^{19}+H^1$ . . . . . W. B. McLean, R. A. Becker, W. A. Fowler and C. C. Lauritsen 796
Evolution of Red Giants . . . . . G. Gamow 796
Ionization of Mercury . . . . . T. McFadden 797
Production of Neutrons in Uranium Bombarded by Neutrons . . . . . H. L. Anderson, E. Fermi and H. B. Hanstein 797
Structure of the Be I Line λ4573A . . . . . S. Mrozowski 798
Instantaneous Emission of Fast Neutrons in the Interaction of Slow Neutrons with Uranium . . . . . Leo Szilard and Walter H. Zinn 799

Proceedings of the Metropolitan Section of the American Physical Society, March 24, 1939 . 801

May 1, 1939

Stopping Power of Mercury and of Nitrogen for Cosmic-Ray Electrons . . . . . James H. Bartlett, Jr. 803
Nuclear Isomerism in Element 43 . . . . . G. T. Seaborg and E. Segrè 808
Appendix on the Calibration of the Ionization Chamber . . . W. Gentner and E. Segrè 814
Townsend Coefficients for Ionization by Collision in Pure and Contaminated Hydrogen as a Function of the Cathode Material . . . . . Donald H. Hale 815
Resonance Scattering of Protons by Lithium . . . . . E. C. Creutz 819
Nuclear Spins and Magnetic Moments by the α-Particle Model . . . . . R. G. Sachs 825
Inner, Initial, Magnetic Permeability of Iron and Nickel at Ultra-High Radiofrequencies . . . . . Justin L. Glathart 833
On the Creation of Pairs or Positrons by Fast Electrons . . H. R. Crane and J. Halpern 838
Neutrons from the Breakup of He^5 . . . . . H. Staub and W. E. Stephens 845
Magnetic Rotation Spectra of SO_2 and CS_2 in the Ultraviolet . P. Kusch and F. W. Loomis 850
Influence of Atomic Electrons on Radiation and Pair Production . . . . . John A. Wheeler and Willis E. Lamb, Jr. 858
Packing Fraction Differences Among Heavy Elements . . . . . Alvin C. Graves 863
Diurnal and Sidereal Effects and the Meteorologic Influences on Shower and Vertical Intensity of Cosmic Rays . . . . . J. Barnóthy and M. Forró 868
Cosmic-Ray Particles at Great Depth . . . . . J. Barnóthy and M. Forró 870
Symmetry Properties of Variational Functions . . . . H. M. James and A. S. Coolidge 873

Letters to the Editor:

On Stability in the Sense of Poisson for Orbits of Cosmic Rays, and Magnetic Storms . O. Godart 875
Delayed Neutron Emission from Uranium . . E. T. Booth, J. R. Dunning and F. G. Slack 876
Identification of Some of the Products of Uranium Cleavage . . . . . Philip Abelson 876
Search for Beta-Particles Emitted During Uranium Fission Process . . . . . J. W. Kennedy and G. T. Seaborg 877
Erratum: The Scattering of Alpha-Particles by Argon, Oxygen, and Neon . Gordon Brubaker 877
Nuclear Excitation of Indium with Alpha-Particles . . . . . K. Lark-Horovitz, J. R. Risser and R. N. Smith 878
Vibration-Rotation Energies in the Tetrahedrally Symmetric XY_4 Type of Molecule . . . . . W. H. Shaffer, H. H. Nielsen and L. H. Thomas 878
Progressive Breakdown in a Conducting Liquid . . . . . L. B. Snoddy and J. W. Beams 879
Radioactive Halogens Produced by the Neutron Bombardment of Uranium and Thorium . . . . . R. W. Dodson and R. D. Fowler 880
Dispersion of Water for Electromagnetic Waves . . . . . Lester L. Skolil 880
Decay of Willemite and Zinc Sulphide Phosphors . . . . . R. P. Johnson 881
Remarks on the Anomalous Damping of Ultrasonic Waves . . . . . O. Halpern 881

MAY 15, 1939

Gamma-Ray Ion Currents in Air at High Pressures and High Gradients at High and Low Temperatures . . . . . JAMES W. BROXON AND GEORGE T. MERIDETH 883
Band Spectrum of HS . . . . . MARGARET N. LEWIS AND JOHN U. WHITE 894
On the Magnetic Scattering of Neutrons . . . . . O. HALPERN AND M. H. JOHNSON 898
On the Theory of the Forward Scattering of Neutrons by Paramagnetic Media . . . . . J. H. VAN VLECK 924
Intercalibration and Comparison in Two Laboratories of Measurements Incident to the Determination of the Geological Ages of Rocks . . . . . R. D. EVANS, CLARK GOODMAN, N. B. KEEVIL, A. C. LANE AND W. D. URRY 931
Conditions for Producing Intense Ionic Beams . . LLOYD P. SMITH AND G. W. SCOTT, JR. 946
Focused Beam Source of Hydrogen and Helium Ions . . . . . G. W. SCOTT, JR. 954
On Radiative Corrections for Electron Scattering . . . . . S. M. DANCOFF 959
Liquid-Drop Model and Nuclear Moments . . . . . KATHARINE WAY 963
Detection of Single Positive Ions, Electrons and Photons by a Secondary Electron Multiplier . . . . . JAMES S. ALLEN 966
Mechanism of the Lightning Discharge . . . . . J. M. MEEK 972

Letters to the Editor:

On the Interpretation of β-Disintegration Data . . . A. I. ALICHANIAN AND V. BERESTZKY 978
X-Ray Emission from the Isomers of Radioactive Bromine . . . . . L. I. ROUSSINOW AND A. A. YUSEPHOVICH 979
Neutron Measurements with Boron-Trifluoride Counters . S. A. KORFF AND W. E. DANFORTH 980
Detonation of Nitrogen Iodide by Nuclear Fission . . . . . EUGENE FEENBERG 980
Energy Distribution of Uranium Fission Fragments . . . . . E. T. BOOTH, J. R. DUNNING AND F. G. SLACK 981
Range Distribution of the Uranium Fission Fragments . . . . . E. T. BOOTH, J. R. DUNNING AND G. N. GLASOE 982
Fission Products from Uranium . . . . . G. N. GLASOE AND J. STEIGMAN 982
Concerning the Nature of Radio Fade-Out . . . . . D. F. MARTYN 983
Comparison of the Secondary Electron Emission Due to H_2^+ and D_2^+ Ions . . MONICA HEALEA 984
Interaction of Fast Neutrons with Protons . . . E. O. SALANT, R. B. ROBERTS AND P. WANG 984
Phenomenon of Secondary-Electron Emission . . . . . HERBERT NELSON 985
Cosmic Rays from Supernovae . . . . . F. ZWICKY 986
On the Structure of Solid Solutions . . . . . J. A. WASASTJERNA 986
On the Splitting of Heavy Nuclei by Slow Neutrons . . . . . J. FRENKEL 987
Angle Dependence and Range of Nuclear Forces . . . . . D. R. INGLIS 988
Penetrating Beta-Particles from Uranium Activated by Neutrons . . . . . H. H. BARSCHALL, W. T. HARRIS, M. H. KANNER AND LOUIS A. TURNER 989

JUNE 1, 1939

X-Ray Study of the Changes that Occur in Malleable Iron During the Process of Fatiguing . . . . . RAYMOND G. SPENCER 991
Rossi Transition Curve for Small Angle Showers . . . . . W. M. NIELSEN, J. E. MORGAN AND K. Z. MORGAN 995
Scattering of Protons by Protons . . . . . R. G. HERB, D. W. KERST, D. B. PARKINSON AND G. J. PLAIN 998
Analysis of Experiments on the Scattering of Protons by Protons . . . . . G. BREIT, H. M. THAXTON AND L. EISENBUD 1018
Reflectivities of Evaporated Metal Films in the Near and Far Ultraviolet . . . . . GEORGE B. SABINE 1064
Magnetoresistance of Nickel in Large Fields . . . . . C. W. HEAPS 1069
L_{III} Absorption of Iodine, Barium and Some Compounds of Barium . . EDWARD H. GREEN 1072
New Proof of the H Theorem . . . . . O. HALPERN AND F. W. DOERMANN 1077
On the Theory of Isotope Separation by Thermal Diffusion . . . . . W. H. FURRY, R. CLARK JONES AND L. ONSAGER 1083
Calculation of the Second Virial Coefficient of Helium Gas for the Lowest Measured Temperature . . . . . LEON GROPPER 1095
Infra-Red Pleochroism and Fermi Resonance Associated with CH_2 Groups in Crystals . . . . . JOSEPH W. ELLIS AND JEAN BATH 1098

Letters to the Editor:

Velocity of Radio Waves in Air . . . . . GEORGE H. BROWN 1100
Transmission of Slow Neutrons through Crystals . MARTIN D. WHITAKER AND HAROLD G. BEYER 1101
Prediction of the Remaining Course of the Present Sunspot Cycle . . . . . JOHN Q. STEWART AND FORREST C. EGGLESTON 1102
On the Shape and Stability of Heavy Nuclei . . . . . GALE YOUNG 1102
Approximate Equality of the Proton-Proton and Proton-Neutron Interactions for the Meson Potential . . . . . G. BREIT, L. E. HOISINGTON, S. S. SHARE AND H. M. THAXTON 1103
Unsuccessful Search for Transuranic Elements . . . . . EMILIO SEGRÈ 1104
Concentrating the Uranium Isotope of Twenty-Three-Minute Half-Life . . JOHN W. IRVINE, JR. 1105
Difference in Coulomb Energy of Light, Isobaric Nuclei . . . . . J. G. FOX, E. C. CREUTZ, M. G. WHITE AND L. A. DELSASSO 1106
Simple Capture of Neutrons by Uranium . . . . . H. L. ANDERSON AND E. FERMI 1106

Proceedings of the American Physical Society:

New York State Section, Hamilton College Meeting, April 1, 1939; Minutes 1108
Washington Meeting, April 27–29, 1939; Minutes and Abstracts 1–183; Author Index 1109

JUNE 15, 1939

Further Study of Cosmic Rays on the Pacific Ocean . . . . . PIARA S. GILL 1151
Compact Pressure-Insulated Electrostatic X-Ray Generator . . . . . JOHN G. TRUMP AND R. J. VAN DE GRAAFF 1160
Dipole-Dipole Resonance Forces . . . . . G. W. KING AND J. H. VAN VLECK 1165
Binding Energy of He^6 and Nuclear Forces . . . . . H. MARGENAU 1173
Nuclear Magnetic Moments of N^{14}, Na^{23}, K^{39} and Cs^{133} . . . . . P. KUSCH, S. MILLMAN AND I. I. RABI 1176
Coulomb Energies and Nuclear Models . . . . . HARRISON BROWN AND D. R. INGLIS 1182
Application of Heat Transfer Data to Arc Characteristics . . C. G. SUITS AND H. PORITSKY 1184
Electron Scattering and Plasma Oscillations . HARRISON J. MERRILL AND HAROLD W. WEBB 1191
Variation with the Density of Mercury Vapor of the Intensity of the Spectral Lines of Mercury Excited by Electron Impact . . . . . O. S. DUFFENDACK AND O. G. KOPPIUS 1199
New Terms in Fe I, II, and III and Additional Far Ultraviolet Standards . LOUIS C. GREEN 1209
Many-Body Interactions in Atomic and Nuclear Systems . H. PRIMAKOFF AND T. HOLSTEIN 1218
Positive Column of the Nitrogen Arc at Atmospheric Pressure . . . . . EDWARD S. LAMAR, ALBERT M. STONE AND KARL T. COMPTON 1235
On the Calculation of Polarizabilities and Van der Waals Forces for Atoms in *S* States . . . . . JULIAN K. KNIPP 1244
Conservation of Momentum in Electrical Conductivity . . . . . W. V. HOUSTON 1255
Meson Theory of Nuclear Forces . . . . . H. A. BETHE 1261

Letters to the Editor:

Excitation Function for Iron by Energetic Deuterons . . . . . J. M. CORK AND B. R. CURTIS 1264
On the Angular Distribution of the Fast Neutrons Scattered by Atoms . . . . . SEISHI KIKUCHI, HIROO AOKI AND TETUO WAKATUKI 1264
Powder Patterns on Permalloy Crystals . . . . . J. W. SHIH AND TSU-YEN CHAI 1265
Search for Heavy Cosmic-Ray Particles with a Cloud Chamber . . . . . G. HERZOG 1266
Zenith Angle Distribution of the Hard Component of Cosmic Rays and the Mass of the Mesotron . . . . . PAUL WEISZ 1266
Collision Cross Sections of K Atoms and K_2 Molecules in Gases . . . . . PAUL ROSENBERG 1267
Variation of the Adiabatic Elastic Constants of Polycrystalline Ammonium Chloride with Temperature between 200°K and 273°K . . . . . A. W. LAWSON AND RICHARD SCHEIB 1268
Long-Lived Radioactive Fe^{55} . . . . . J. J. LIVINGOOD AND G. T. SEABORG 1268
Stability of Uranium and Thorium for Natural Fission . . . . . W. F. LIBBY 1269
Secondary Emission of Electrons from Sodium Films Contaminated by Gas . PAUL L. COPELAND 1270
Possible Use of Superconductivity for Radiometric Purposes . . . . . ALEXANDER GOETZ 1270
Anomalies in the Directional Intensity Distribution of Cosmic Rays . . . . . H. S. RIBNER 1271
Fine Structure in the Zenith Angle Distribution of Cosmic Rays . . . . . DENSIL M. COOPER 1272
On Alfven's Hypothesis of a "Cosmic Cyclotron" . . . . . E. R. SABATO 1272
Raman Effect of Fluorochloromethane . . . . . GEORGE GLOCKLER AND J. H. BACHMANN 1273
Erratum: Range Distribution of the Uranium Fission Fragments . . . . . E. T. BOOTH, J. R. DUNNING AND F. G. SLACK 1273
